Synpulse and K&W Software AG join forces
to deliver your digital ambition -
from strategy and design to implementation.

Avaloq Front Platform (AFP)

Avaloq offers a comprehensive digital suite supported by a cutting-edge technology as part of the Avaloq Banking Suite. It is either offered «as a service» to allow a swift implementation or as a software with an on-premises installation. The Avaloq Software Exchange provides integrated third-party solutions that complement and extend Avaloq's digital offering.

The Combined Capabilities of Synpulse and K&W Software AG Provide a One Stop Shop For Front Portal Solutions

ACP Integration Expertise

Synpulse is proud to be an Avaloq premium implementation partner. It counts more than 85 Avaloq Certified Professionals in Switzerland, Germany, UK, Singapore, Hong Kong and the US working on projects for some of the biggest leaders in the banking industry. Synpulse has also been part of several AFP integration projects.

Business Domains Expertise

Synpulse has in depth banking domain knowledge and transformation expertise, that is required to unlock the value of a Front Portal. With competences in Operational Excellence, Digital Banking, and Regulatory & Compliance, Synpulse can ensure an efficient Front Portal, enabling front line staff in advising their clients in a compliant way.

Front Development Expertise

K&W is a certified Avaloq Software Exchange partner and has more than 20 software engineers with banking background and Java EE/JS development capabilities, locally developing in Zurich. They offer comprehensive project experience in the financial service industry.

Agile Development

Both partners strongly believe that Front Development projects need to be approached in an agile way and that concepts shall be approached and tested early by means of a minimum viable product. Our agile SPEED method and DevOps result in a continuous delivery and provide you with the controls required to steer the project successfully.

Proof of Concept

Our structured proof of concept approach enables you to explore and assess the capabilities and benefits of AFP at low risks within a 6 to 8 week's timeframe. The proof of concept is based on selected use cases, demonstrating the AFP core functionality and integration capabilities. The result will be a decision basis for an AFP investment.
